

CORE Luxury Apartments

KANSAS CITY, MO

About the Project

CORE Luxury Apartments is a 4-story, 353-unit development that features studio, one- and two-bedroom apartments with high-end finishes providing a modern, luxurious living option to Kansas City's downtown Berkley Riverfront area.

The pedestrian friendly and dog friendly space includes ample amenities such as concierge-style services, resort-style pleasantries, rock climbing, a co-working space, club room, heated salt-water pool, and fitness center. The development is located directly across from Union Berkley Riverfront apartments and walking distance from Bar-K Dog Park.

What We Did

Taliaferro & Browne provided land surveying and civil engineering services including topographic and property surveys, platting, and easement descriptions. Full civil engineering design services included site layout, grading, public and private utility design, stormwater management, and erosion control.
